

EpollPoller::removeChannel

EpollPoller::updateChannel

Channel::index

```
graph LR; A[EpollPoller::removeChannel] --> C[Channel::index]; B[EpollPoller::updateChannel] --> C;
```

The diagram illustrates a dependency or data flow. On the left, two rectangular boxes are stacked vertically. The top box contains the text 'EpollPoller::removeChannel' and the bottom box contains 'EpollPoller::updateChannel'. On the right, there is a single rectangular box with a light gray fill and a black border, containing the text 'Channel::index'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the right box. The top arrow starts from the right side of the 'EpollPoller::removeChannel' box, and the bottom arrow starts from the right side of the 'EpollPoller::updateChannel' box. Both arrows converge towards the 'Channel::index' box, indicating that both methods interact with or depend on this index.
